The "Just Cause of the Palestinian People" that has been deceived for more than 50 years - Temple of Literature - World Wide Blog - World Wide Reader Network (computer version)

Whether you grew up in the mainland, Hong Kong, Taiwan and other areas, as long as you read Chinese, most of them will not miss the slogan "Just Cause of the Palestinian People" or similar different statements. The modern evolution of the world, coupled with the continuous catharsis of these slogans, will make you puzzled or doubt about fairness and justice, or sympathize with one ethnic group, and at the same time disgusted with other opposite ethnic groups. However, since it is a repeated deliberate propaganda, there will definitely be many flaws and logical confusion. As a person who usually has a herd mentality, this is not a problem. But for people who are open-minded and mentally say, it is an opportunity or challenge to become a window to understand human nature, history and society. Last weekend, Hamas in the Gaza corridor launched a terrorist attack on Israeli civilians. Israel immediately counterattacked, once again provoking a debate about justice around the world.

It is better to hear it than to see it once. That's the truth. When I set foot on this disputed land in recent years, many problems that I had been puzzled for many years were swept away. Judging from the phrase "the cause of justice of the Palestinian people", the intention is quite cunning or obviously deceptive. Historically and legally, the term "Palestinian" was most widely used during the British occupation period, officially

launched in 1918, including Jews, Arabs, natives and other residents here. Jews at that time also held passports for British Palestine. For more than a thousand years, it has been barren and dry here, and it is difficult for more than one million people to survive. Some ethnic groups were exterminated or assimilated, and the United States was forgotten by the world but exalted by the religious community because she was the birthplace of the Bible and the Jews. Hundreds of years later, other derived religions insisted that the priest had pedaled the Temple Mountain in his previous life, so there is only now the Golden Top Building.

Which ethnic group does the "Just Cause of the Palestinian People" refer to? Traditionally and legally, the Palestinian people could not be equalised with the Arabs at all, because there was no Arab country in the British-occupied Palestinian area at that time, and this was the birthplace of the ancient country of Jews, which was recognized by human history. When the "Palestinian Area" was divided in 1946, what was the strangeness of more Arabs than Jews and more working people than bosses? However, the surrounding Arab nobles retited. They were unwilling to recognize the status of Jews and began to desperately drive out Arab refugees to seize territory. The return of a large number of Jews to business has restored it to a nourishing "beautiful land" rich in milk and honey, which in turn attracted countless poor Arabs to dig for gold.

After the Jews established the State of Israel on May 14, 1948, the upper Arab class was pregnant with ghosts and could not establish the country, although they were divided the best land. The so-called "Palestinian State" finally declared its official independence on November 15, 1988. Therefore, this "country" is indeed dominated by Arabs at present, but it is under the effective jurisdiction of the State of Israel. There are countless factions in the "Ba Kingdom", representing the interests of different classes and surrounding countries. However, more than 70 years ago, some people shouted for the "righteous cause of the

Palestinian people", and the slogan has not changed so far. This is deliberately misleading the people. It seems that the Palestinian people are the Arabs around them. When it is found that the noble "career" is a lie, there is no so-called justice, and there must be the evil trick of the devil behind it.

The current Israeli-Palestinian conflict is mainly a territorial issue, which is also the biggest center of lies. The Palestinian side, the Arab world, several Iron Curtain countries, and even on the Western network, have scattered a large number of maps of territorial changes of the "Palanian State" (four green maps below). This map is very informative and deceptive: from 1946 to now, all green has been gradually robbed by the State of Israel. Is it hateful? But lies can only deceive the majority of the lower Arab middle class, the pink world and the other people of the ignorant world. Recently, because of the war, someone made a truth map under the green map, which is clear at a glance. Based on the history, it is not difficult to find that "Baguo" is a veteran of fake fraud and belongs to the category of extreme scoundrels. Therefore, it is not surprising that an anti-human terrorist organization like Hamas has emerged.

I believe that most Chinese who have never been to Israel have never seen the original "Territorial Change Map" of "Pa's Country". This is a basic lesson to understand the entry point of the so-called "Israel-Palestin conflict" and the "righteous cause". Some people may think that this picture is a Jewish conspiracy and a Western-made one. For a long time, this picture of Pakistan being invaded by Israel has been popular on the Internet. It seems that no one can justify it, but I accidentally found the source of the fake. The so-called "Pakist" on the west bank of the Jordan River is separated by hundreds of miles-long walls, including famous cities such as Hebrew, Nazareth and Berethen because of the constant terrorist incidents. When I visited the territory of "Baguo" for the first time, I saw the original territorial change map in front of the "Baguo" police station opposite the busiest Christmas church, and

personally took a picture of the publicity window where countless people passed by every day. Please note that the Israeli authorities did not interfere with such public rumors and lying maps, and in fact, tourists were not interested in the map.

The police of "Ba" are also friendly to the people. I also went into the police station and looked around.

Israel plugs border with Gaza and readies possible ground invasion

On Wednesday, the Israeli military said it had regained control of the region right outside Gaza and designated it a closed military zone.

After the establishment of the State of Israel, from the next day, it experienced more than five large-scale wars, which can be said to be a war between hundreds of millions of people in several countries against hundreds of thousands and millions of people. However, Israel became stronger and stronger in the war, creating many battlefield miracles. Many "Allah" Arabs are indeed afraid, knowing that they are not opponents and suspect that Allah is in the other's position. In the early years, Jordan and Egypt were unsurvinced, and their occupation formed the current two Arab areas of the West Bank and Gaza. However, in the Middle East War of 1967, Israel took advantage of the opportunity to drive away the armies of the two countries, and since then it has almost controlled the entire territory and the Sinai Peninsula in Egypt. But for the sake of the peace plan, Israel finally agreed to give the two regions a limited degree of autonomy.

Israel has always recognized the right of residence of Arabs, while Arabs

have always not recognized the status of Jews. Arafat also lied, claiming that Arabs were natives of Canaan. Later genetic research also confirmed that the so-called Palestinians are basically from the surrounding Arabs. Jordan and Egypt recognized Israel's status and improved relations because of the peace plan, but tore apart the Arab countries. In 2005, the Israeli army withdrew from the Gaza settlements and the National Defense Forces. It is said that Saudi Arabia and Israel are about to improve relations. Of course, this move will change the interests of the upper Arabs and touch the centripetal force of the people at the bottom, which is undoubtedly one of the motives for the terrorist attack on Hamas in Gaza.

When traveling in Ira, especially in the Arab area, you can see many extremely luxurious houses, and there is not much difference in Jewish settlements. The local Chinese told me that the gap between the rich and the poor of Arabs is huge. The lower Arabs are controlled by the upper class, especially by using religion to deceive the people. On the contrary, in the Jewish area, there is not much difference from the Western world. Society pays great attention to fairness, freedom and the rule of law, especially for the education of teenagers. Cultivate independent thinking ability from an early age, be polite and sincere to people. Many Arab teenagers receive hate education, and throwing stones is the most common subject. Western media pay more attention to reporting on the human rights situation in Arab areas, while Jews try their best to protect the safety of citizens. These citizens also include Arab citizens and green card holders, with as many as 1-2 million.

Many people sympathize with the right to live of Arabs (some people called Palestinians or Israeli foreigners) who are isolated by the wall. They can go through the sentry to work in the outer area, as long as they don't make trouble and everything is safe. I have to mention that water, electricity, medical care and other public services in the isolation wall are provided free of charge by Israel. There are many people who are blind, but the uterus will produce. A large amount of foreign aid, including the "left" of the West, supported the population explosion in the West Bank and Gaza, but more money flowed into the pockets of the aristocracy. They buy property overseas, but are afraid that Israel's fair, free and legal civil society will become a model for the Arabs. Does it sound familiar?

Therefore, Arab citizens and green card holders understand these truths. They are free, many of them are well-educated, bilingual, and live a much

better life than their compatriots. Arabs of some sects can also join the National Defense Forces. So not every Arab is a supporter of terrorists.

While traveling in I, I met young people with weapons on various occasions. Many people speak English fluently, and I have no trouble taking photos. In order, you can see the female soldiers guarding the Hebrew City on the Jordan River. They have taken photos and talked to each other. On the highlands of Blessing Mountain and the highway below, you can see the sentries of the soldiers. The soldiers looked down at the Arab city below, and the photos were rare. Next is the border of the border of the Republic of the temple and the Stree. Please note that according to the agreement, the administrator of Temple Mount is from Jordan. During his occupation, the King of Jordan flew over the top of the Temple Mountain by plane, and he also donated the Golden Tower. Therefore, the "righteous cause" of Pakistan was invaded and encroached on. I dare not mention the history of the occupation of Jordan.

Israeli youth pay attention to historical education. I saw a model of military school students visiting Jerusalem. They are disciplined and lively, which shows me the powerful secret of this country and the connotation of civilization defeating barbarism. We got lost in the southern desert of the country and saw a building in the distance, which we thought was a nuclear facility. While talking, a small car came galloping, and the young man pointed out the way out for us with a friendly attitude. Later, the tour guide told the history of nuclear development. A Jew firmly opposed it and was imprisoned for leaking secrets. But later, he settled in Jerusalem, indicating that the country's legal system and civil rights were put into practice.

Back to the current "Israeli-Palestinistine" conflict in the Gaza corridor is not a simple problem of "killing chickens", because both sides know that Israel's biggest weakness is the constraints of the political system, the

legal system and international public opinion, which cannot eradicate the soil of terrorism. Both Israel and Afghanistan understand that if the Arabs lay down their weapons, there will be peace; while the Jews will put down their weapons, there will be no Israel. Both sides understand that in the Bible, God's eternal promise to both sides, no one can destroy each other. However, from the beginning, the Arab people wanted to destroy Israel. After being beaten, some people accepted their fate. But the black hands behind will never give up. Their tricks to disguise the cause of justice will still continue, so the people at the bottom of Gaza will pay a greater price.

Summarize the ten basic facts of introducing Chinese

Arab-Israeli conflict - ten basic facts you must not know

I. The origin of the whole conflict. In a word, Jews recognize the right of Arabs to exist, while Arabs and the Islamic world do not recognize the right of Jews to exist. This is the basic basic!

II. The right to establish the country independently after World War II (also known as the Palestinian area) is the result of the long-term struggle of the Zionist movement. The Arabs in the region have no great merits. They are not satisfied with the division of half of the country, and they want to be swallowed by a family alone. Palestinian nationalism was developed after 1967 because Arab countries were beaten by Israel and there was a power vacuum between Arab and Israel. Resisting Britain 47 years ago and resisting Arab countries after 47 years, not only the

establishment of Israel was created by Jews, but also by Jews when Palestine had the opportunity to establish a country.

III. When the General Assembly made the resolution of the division of governance, the resolution of the Arab-Israeli problem was carried out within the framework of international consultation. It was the Arabs who launched the First Middle East War and tried to exterminate Israel that the Arab-Israeli dispute was finally transformed into an Arab-Israeli conflict, and the principle of violence became the rule of the game.

IV. During the First Middle East War, the number of Jewish refugees fleeing the Arab world and Arab refugees fleeing Palestine was basically the same, both between 600,000 and 800,000. Israel silently absorbed its refugees and spent great efforts to integrate them into the Israeli society, which was originally dominated by Western Jews. It did not ask the international community for a penny, nor did it take the solution of its refugee problem as a prerequisite for achieving peace. On the other hand, most Arab countries, except Jordan, keep Palestinian refugees in refugee camps, severely prohibit them from integrating with local communities, intending to create and expand the problem of Palestinian refugees, and make the international community bear the burden of refugees' lives. At the same time, the so-called issue of the right of Palestine refugees to return has been a major obstacle to peace between Israel and Palestine.

V. From the friction between Jews and Arabs in Israel in the 1920s to the beginning of the Israeli-Palestinian peace process in the 1990s, almost all proposals for peaceful coexistence were rejected by Jews and Arabs, with Sadat as an exception.

VI. Jerusalem became a Jewish holy place at least around 1000 BC, and became an Islamic holy place as early as the 7th century AD (the original Muslims prayed to Jerusalem instead of Mecca). After the Crusade, Jerusalem was neglected by Islam for a long time, and it was not warmed

up again until the return of the Jews.

7. From the Arab-Israeli ceasefire in 1948 to the outbreak of the Six-Day War in 1967, in the past 20 years, Arabs have occupied Palestinian territory, including East Jerusalem, which is larger than the land that the international community has established the Palestinians today, but they have never established a state. Israel has no influence on the region during this period. Therefore, the Palestinians have nothing to do with Israel without the establishment of the country!

VIII. Jews established their states on this land at least three times (the ancient kingdom of Israel, the kingdom of Maccabi, modern Israel), and established effective rule, and the "Palestinians" never once.

IX. Today, more than 1 million Arab citizens live in the small Israeli territory, enjoying all the rights granted to them by the liberal democracy, including marching and protesting in war and in solidarity with the rights of hostile countries. Only a few thousand Jews live in the vast Arab land, the vast majority of whom live in North Africa (in relatively mild countries such as Tunisia and Morocco). Even in Tunisia, where democracy is the most successful, the draft constitution stipulates that any relationship with Israel or Israelis is a crime.

10. Despite more than 60 years of war, from cherry tomatoes to computer flash memory, the brilliant inventions and creations of modern Israeli civilization are affecting the daily life of each of us; a country with a population of 8 million has contributed 9 Nobel Prize winners to the world! And what has the Arab world contributed to mankind in the past 60 years?

Zhang Ping July 20, 2014 in Tel Aviv
